SUMMARY

My current focus is on the MERN stack and Next.js, where I'm actively improving my skills in TypeScript, backend architecture, and modern web development practices. I like learning by building projects, experimenting with new tools, and continuously refining my code to follow clean and maintainable patterns.

TECHNICAL SKILLS

JavaScript (ES6+), React, Tailwind CSS, Bootstrap, Typescript, Next.JS, Node & Express.JS and MongoDB

PROJECTS

Blog Application (React)

- Built a blog app with create, delete, and list functionality
- Implemented data fetching using Fetch API and JSON Server
- Used conditional rendering for loading states

Weather Application

- Displays hourly and daily weather forecasts
- Fetches real-time weather data from an API
- Responsive layout for mobile and desktop

Browser Extension Manager UI

- Dynamic card rendering from JSON data
- Implemented dark mode using localStorage
- Active/inactive filtering logic

Todo List Application

- Task creation and deletion
- Dark mode support
- Responsive UI using Tailwind CSS

TOOLS

GitHub, Git, Postman

EDUCATION

Bachelor of Science in Information Technology – STI College
